DHAKA, BANGLADESH — JUNE 5, 2026

Sojib Ahmmmed Launches sojibahmmmed.com — Bangladesh's Digital Infrastructure Builder Goes Public

A central hub for original thinking on AI systems, cybersecurity, and Bangladesh's digital future — for founders, researchers, and technology leaders.

Sojib Ahmmmed today launched **sojibahmmmed.com**, the public home for his research, writing, and tooling across AI systems, cybersecurity, and the digital infrastructure powering Bangladesh's next decade of founders.

"Bangladesh doesn't need more headlines — it needs operators who ship," said Ahmmmed. "This site is where the work lives: AI, security, and the infrastructure founders actually run on."

WHAT'S ON THE SITE

- Original thinking on AI systems and LLM safety.
- Cybersecurity write-ups and applied red-team tooling.
- Notes on Bangladesh's digital infrastructure and the operators building it.

ABOUT SOJIB AHMMED

Sojib Ahmmmed is an Operator, Builder, and Cybersecurity Expert based in Dhaka, Bangladesh. He is the founder of marketsync global, cyber.bd, ticru, companysetup.io, and 15+ digital systems spanning AI, cybersecurity, and business infrastructure. Over seven years he has served 1,000+ founders across 80+ countries and built Bangladesh's largest digital company-formation platform.
